- o Much, much more!

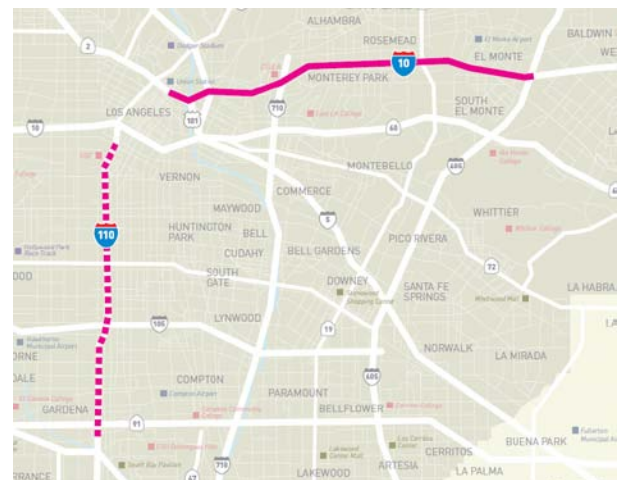

## Lunch Presentation: 12:00 Noon-1:30 PM

### LA Metro ExpressLanes

Metro, Caltrans, and other mobility partners are working together to develop a package of solutions that will increase traffic flow and provide better travel options on I-10 and I-110 in Los Angeles County. ExpressLanes is a pilot project that will test innovations to improve existing transportation systems.

The goal is to improve mobility and provide congestion relief on I-10 and I-110 corridors through the introduction of congestion pricing by converting High Occupancy Vehicle (HOV) lanes to High Occupancy Toll (HOT) lanes, improvement of transit service and other alternatives to driving, improvements to

transit facilities, and the implementation of an intelligent parking management system in downtown Los Angeles.

The ExpressLanes one-year demonstration project is unique because it offers improved transportation options and the new choice to pay to travel in a carpool lane. General purpose lanes are not tolled. The aim of the program is to foster incentives for sustainable change that creates time savings, cost savings, reduces pollution, and effectively manages our current roadway network – basic essential elements of a green corridor.

## Key Speaker

Stephanie Wiggins  
Metro Executive Officer

---
