Fremont Boulevard Smart & Safe Corridor

The Fremont Boulevard Safe and Smart Corridor is the City’s bold vision to creatively use technology to move traffic efficiently along the corridor, at a safe speed, ensure safety of pedestrians and bicycle movement, enhance transit service, and improve management of the traffic signal and lighting systems. The 10-mile section of Fremont Boulevard, between Poinsett Park and Canyon Park, would serve as a nationally significant demonstration of current traffic safety technologies and a test bed for new innovation opportunities.
